

Rohit Dadarao Chilhorkar

Site Reliability / Platform Engineer | AWS, Kubernetes, Observability, Python

Pune, Maharashtra, India | +91 8308745001 | rdchilhorkar@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

DevOps / SRE engineer with **3+ years** of experience keeping production platforms reliable on **AWS, Kubernetes and Linux**, most recently on **NICE Actimize financial market-surveillance systems** that process **1M+ alerts a day**. Hands-on experience with monitoring and alerting, incident triage, release automation and **Python/Bash tooling that removes manual toil**, including an LLM-assisted rightsizing tool that cut AWS spend by **\$30K a year** and fleet automation across **475+ EC2 instances**. Experienced in Terraform, Ansible, Helm and GPU-backed EKS platforms for AI workloads.

TECHNICAL SKILLS

Observability & Reliability: Prometheus, Grafana, CloudWatch, Alerting, Incident Triage, Root Cause Analysis

Programming & Scripting: Python (Boto3), Bash, YAML

Containers & Platform: Docker, Kubernetes, Amazon EKS, Karpenter, Helm, ArgoCD, GitOps, NVIDIA GPU Nodes

DevOps & Automation: Git, Ansible, Terraform, Jenkins, GitLab CI, GitHub Actions, Blue-Green Deployments

Cloud & Cost: AWS (EC2, EKS, IAM, IRSA, VPC, RDS, S3, EFS, KMS, CloudWatch), Linux, Cost Optimization

Messaging & Data: ActiveMQ, RabbitMQ, MySQL, PostgreSQL, SQL Server

EXPERIENCE

DevOps Engineer, NICE Interactive Solutions Private Limited

Nov 2025 - Present

Pune, India | *NICE Actimize SurveilX: Markets Surveillance, Communication Surveillance, AI*

- Containerized **9+ core services** of the Markets Surveillance Cloud onto **Amazon EKS** as Deployments, StatefulSets and Jobs based on each workload's nature, and deployed **ActiveMQ** messaging handling **1M+ financial alerts per day**.
- Designed connectivity from the EKS-hosted RCM UI to an IP-whitelisted Tableau server: added an **Nginx reverse proxy** on the server and whitelisted the **cluster CIDR** instead of ephemeral pod IPs; **live in production**.
- Implemented **SVX Monitor**, log-based observability and alerting for the RedEye surveillance engine on EKS: reads live logs from shared PVC volumes across **6 components** (4 Deployments, 1 StatefulSet, 1 Job) and detects **failures, errors and performance issues**, with ConfigMap-driven rules.
- Deployed the SurveilX AI platform (**3 AI services**: alert classification, alert deduplication, AI Assist) on EKS via **Jenkins, Ansible, Helm and Terraform**, with **Karpenter CPU and NVIDIA GPU pools scaling from zero** for Llama 3.1/3.2 inference and IRSA (no static credentials).
- Automated AMI migrations across **475+ EC2 instances** with **Python and Bash**, replacing a manual patching process.
- Scripted the **ActOne upgrade** for the VM-based Communication Surveillance product; supported **UAT and production** runs, handed over to the team and provided support when needed.
- Automated the **Market Data Service v2-to-v3 migration**; moved Jenkins to **dynamic agents**; built CloudWatch-to-S3 log pipelines and automated error analysis in nightly releases.
- Built an **LLM-assisted rightsizing tool** for **1,300+ AWS resources** (EC2, EFS, RDS) that cut monthly spend from **\$32K to \$29.5K** (about **\$30K a year**), plus a **nightly scheduler** that stops non-prod EC2.

DevOps Engineer, Pratiti Technologies (client: Siemens Digital Industries Software)

Jul 2023 - Nov 2025

Pune, India

- Set up **Prometheus and Grafana** dashboards and alerting for infrastructure and application incidents, supporting production troubleshooting.
- Built a **Blue-Green deployment CLI** that automates **15+ validation and deployment steps** for production releases.
- Provisioned and configured AWS infrastructure (EC2, EKS, RDS, S3, IAM, EFS) with **Terraform and Ansible**.
- Wrote **Python and Bash tooling** for deployment validation, IAM permission-boundary troubleshooting and recurring ops tasks.

DevOps & AI Agent Evaluation Engineer, Freelance / Contract

Remote

- Authored **75+ production-outage simulations** (Docker, Kubernetes, IaC) covering root-cause debugging and CI/CD failures, used to benchmark autonomous AI agents.
- Promoted to **Technical Reviewer within 2 months**; reviewed **450+ tasks** and evaluated **2,000+ agent runs** for debugging logic and failure analysis.

EDUCATION & CERTIFICATIONS

B.E. in Computer Engineering, Savitribai Phule Pune University, First Class with Distinction

2019 - 2023

AWS Certified Cloud Practitioner (CLF-C02)
