Summary

DevOps / SRE Engineer with **3+ years** building and running production infrastructure on **AWS and Kubernetes**. Hands-on experience building **EKS platforms for GenAI inference** (Karpenter-managed GPU/CPU nodes, Ollama/Llama 3.1) and for regulated financial-surveillance systems that process **1M+ alerts a day**. Experienced in **Terraform, Ansible, Python and Bash** automation (AMI migrations across 475+ EC2 instances, blue-green release tooling), monitoring and alerting, cloud networking, troubleshooting and root cause analysis for reliability, and **cost optimization and capacity planning** that cut a **$32K monthly AWS bill by about 8%**.

Technical Skills

Cloud: AWS (EKS, EC2, IAM, VPC, RDS, S3, EFS, KMS, CloudWatch), Linux
Kubernetes & Containers: EKS, Karpenter, Docker, Helm, ArgoCD, GitOps, RBAC
IaC & Automation: Terraform, Ansible, Python (Boto3), Bash
CI/CD: Jenkins, GitLab CI, GitHub Actions, Blue-Green Deployments, SonarQube
Observability: Prometheus, Grafana, CloudWatch, Incident Triage
Security: IAM, IRSA, Vault, KMS, Secrets Management
GenAI Infrastructure: Ollama, Llama 3.1, RAG, Milvus, NVIDIA GPU nodes on EKS

Experience

DevOps Engineer, NICE Interactive Solutions Private Limited Nov 2025 - Present
Pune, India | NICE Actimize SurveilX: Markets Surveillance, Communication Surveillance, AI

- Containerized **9+ core services** of the Markets Surveillance Cloud onto **Amazon EKS** as Deployments, StatefulSets and Jobs based on each workload's nature, and deployed **ActiveMQ** messaging handling **1M+ financial alerts per day**.
- Designed connectivity from an EKS-hosted case-management UI to an IP-whitelisted Tableau server: added an **Nginx reverse proxy** on the server and whitelisted the **cluster CIDR** instead of ephemeral pod IPs; **live in production**.
- Implemented **log-based observability and alerting** for the surveillance engine on EKS: reads live logs from shared PVC volumes across **6 components** (4 Deployments, 1 StatefulSet, 1 Job) and detects **failures, errors and performance issues**, with ConfigMap-driven rules.
- Deployed the SurveilX AI platform (**3 AI services**: alert classification, alert deduplication, AI Assist) on EKS via **Jenkins, Ansible, Helm and Terraform**, with **Karpenter CPU and NVIDIA GPU pools scaling from zero** for Ollama / Llama 3.1/3.2 inference and IRSA (no static credentials).
- Automated the migration of **475+ EC2 instances** to **Amazon Linux 2023** (AL2 end of support) with **Python and Bash**, closing patch gaps and meeting **antivirus compliance**.
- Scripted the **ActOne upgrade** for the VM-based Communication Surveillance product; supported **UAT and production** runs, handed over to the team and provided support when needed.
- Moved Jenkins to **on-demand dynamic agents**, retiring **10 always-on t3.2xlarge** build machines; automated the **Market Data Service v2-to-v3 migration** and CloudWatch-to-S3 log pipelines.
- Built an **LLM-assisted rightsizing tool** for **1,300+ AWS resources** (EC2, EFS, RDS) that cut monthly spend from **$32K to $29.5K** (about **$30K a year**), plus a **nightly scheduler** that stops non-prod EC2.

DevOps Engineer, Siemens Digital Industries Software (via Pratiti Technologies) Jul 2023 - Nov 2025
Pune, India | Teamcenter X (cloud PLM)

- Automated version upgrades of **Teamcenter X** with a **Blue-Green deployment** strategy, enabling **zero-downtime releases** and removing manual upgrade steps.
- Built a **Blue-Green deployment CLI** that automates **15+ post-deployment checks**, saving **~30 min per release**.
- Led the migration to **containerized workloads**, making deployments easier to scale and speeding up customer environment provisioning.
- Provisioned AWS infrastructure (EC2, EKS, RDS, S3, IAM, EFS) with **Terraform and Ansible**; set up **Prometheus and Grafana** alerting; migrated workloads to **AWS Graviton**.
- As **Quality Coach**, onboarded **6 repositories** to **SonarQube** quality gates, raised unit-test coverage with unittest and fixed critical issues.

Education & Certifications

B.E. in Computer Engineering, Savitribai Phule Pune University, First Class with Distinction *2019 - 2023*
AWS Certified Cloud Practitioner (CLF-C02)
